Board of Governors,
University of Western Ontario,
London, Ontario.

Gentlemen:

I have the honour to present to you my report upon the University for the academic year of 1935-1936.

Respectfully yours,

W. Sherwood Fox,
President and Vice-Chancellor.

OBITUARY

Dr. William Waugh, M.D. (McGill 1872); LL.D. (Western 1919).

In the death of Dr. Waugh on May twenty-fifth the University lost one of its group of founders and a member of the first teaching staff in Medicine. Many generations of students have known him and have been moulded as men and as practitioners through his influence. Almost up to the very last months of his life Dr. Waugh was active in the affairs of the University, holding the office of Bursar and membership in the Committee of the Board of Governors that directs the Institute of Public Health. To few men is it permitted to enjoy as long a life of uninterrupted service to the community as he enjoyed and to leave behind so revered a memory. His fellow-members of the University are keenly conscious of their loss in his passing.

Dr. James H. Bowman, LL.D. (Western 1932).

In March last the University lost another of its original Faculty of Medicine, Professor James H. Bowman. He was the first Professor of Chemistry and, along with his colleague, Dr. William Waugh, conducted classes in the little cottage that used to stand at the corner of St. James Street and Hellmuth Avenue. Since his retirement from active work in the University he has devoted himself to his hobbies, crystallography and botany, and has established an international reputation as an authority in these fields. He was a member of the Society of Chemical Industry of Great Britain and the British Society of Biological Chemists. He was formerly an active member of the Canadian Entomological Society. Like Dr. Waugh, Dr. Bowman had a wide circle of friends who admired him for his sterling character and his persistence in clinging to his intellectual and spiritual ideals.

Dr. David Harvey Nichol, M.D. (Queen's 1919)

For many years Dr. Nichol had served jointly the Westminster Hospital, London, and the Faculty of Medicine of the University. In the latter he held the positions of Instructor in Physiotherapy and Instructor in Medicine. He endeared himself to all who came in contact with him and won general respect for his skill and high standards in his chosen field. He died in February of this year, sincerely mourned by many friends.

Professor H. L. Henkel, B.A.

When the University in 1925 admitted Waterloo College into affiliation Professor Henkel was a member of the College Faculty. A native of Germany he there obtained a thorough training in philosophy and theology in eminent seminaries and universities. Coming to Canada in 1895 he served the Canada Synod of the Lutheran Church in several capacities and offices. He was Professor of Old Testament Studies in the Seminary and Professor of Philosophy and Hebrew in the College. Since 1934 he was prevented through a serious illness from giving consecutive attention to his duties of instruction. On March second he passed away, deeply mourned by many former students and other friends. His university colleagues in London retain a happy memory of their association with him.

Canon William Reiner

It is appropriate that attention be given here to the death of a former teacher in one of the Hellmuth Colleges. He died in December in Barrie, Ontario, at the great age of ninety-eight. His passing removes the last of the original teaching staff of the two colleges founded by Bishop Hellmuth in 1865 and out of which in part the University derived its origin. At the celebration of the seventieth Anniversary of the establishment of the Colleges two years ago Canon Reiner was one of those who sent special messages to the reunion of former students.

EDUCATIONAL COMMENTS

Needs of the University

The needs of the University that were outlined in my report of last year still remain, some of them more pressing than ever. I refer my readers to the statements appearing on pages four to nine of that report. I do not need to repeat them here. However, to give emphasis to the most urgent needs, I single them out for brief and conspicuous mention.

Under the heading of maintenance I would include the following:

- (1) Increase of regular assured income, through endowment as well as through grants, to enable the Administration to restore

salary reductions as soon as possible and also to make provision for imperative changes in and additions to the curriculum. Unless such provision is made the University will lag behind in its service and will suffer from a shrinking enrolment;

(2) The establishment of a system of retiring annuities for the Faculties. This requirement becomes more serious as years of indecision in this respect pass by;

(3) Support of a definite and adequate programme of research in medicine, the pure sciences, and in language and literature.

Under the heading of material equipment I include, not necessarily in order of degree of urgency:

(1) Students' residences;

(2) A building to serve as a centre of students' social life;

(3) A field house - armoury.

Outstanding Student Activities

During the year the students engaged in a large number of significant activities all of which merit attention. But of two only does space permit one to speak here.

In March there took place in Ottawa a bilingual debate in which two students of our university debated a resolution with two students of the University of Ottawa. One student on each side spoke in French and one in English. This debate may be regarded as one of the fruits of the University's Summer School for French at Trois-Pistoles. To Mr. Robert Ford, a student of the French School for three summers, must be given the credit for initiating the negotiations which led to the final arrangements. In most excellent French he spoke for the side of our university. The chief significance of this bilingual forensic contest is that it assured the French-speaking Canadians of eastern Canada that our university recognizes in a practical way the place of French in our national life.

The debaters representing "Western" succeeded once again in winning the trophy for first place in radio debating among the universities of Ontario.

Music in the University

There are two especially outstanding events in the University's activities in music: the award of a substantial grant made by the Carnegie Corporation of New York and the appointment of a Director, Mr. Frederick L. Newnham.

In recognition of what the University has already accomplished in music in the Summer School and to give the University an opportunity to carry out a special plan prepared with the assistance of Mr. Edward Johnson, Manager of the Metropolitan Opera Company, New York, the Corporation made a grant of \$10,000. In addition the Corporation promised to give the University one of the new music sets to be prepared in the autumn; the value of this set is \$2500.00. The payments of the grant are to be spread over three years: \$5,000 in 1936, \$3,000 in 1937 and \$2,000 in 1938. The purpose of the successively decreasing payments is to spur the University on to make some permanent provision for music by the time the grant expires. This coincides with a provision in the original plan submitted by the University when the request for aid was first made. In order to reach a position of independence those who profit by the advantages made possible by the grant are required to pay certain fees; these are turned into the Carnegie Music Fund.

Through the President and the Alumni Secretary, Mr. J. Mackenzie Dobson, the University continued its association with the direction of the Western Ontario Conservatory of Music. Completion of the plan of reorganization and a conspicuous improvement in the enrolment of pupils in music enabled the managing board to engage a Director of Music. The person appointed to this office is Mr. Frederick L. Newnham, formerly of Acadia University and of the Maritime Academy of Music, Halifax, Nova Scotia. Mr. Newnham is a highly trained musician, a product of the Royal Academy of Music, London. He is a superior teacher and an outstanding musical artist, a lyrical baritone of high quality. He was recommended to the Directors by Mr. Edward Johnson and Mr. Edgar Schofield of New York. Under Mr. Newnham's direction during the past year the Conservatory has continued to develop in a most satisfactory manner. His presence there made it possible for the University also to secure his services.

In addition to the musical activities described in the reports of the Director of the Summer School and of the Director of the Department of Extension, there were certain other activities. Mr. Newnham conducted an hour of singing each week with the students of the Faculty of Medicine, an hour with the students of University College, and also an hour with the students of Huron College. These efforts have had the happy result of increasing the students' appreciation of the place of singing in life. They have also opened numerous avenues of approach whereby the Director may enlarge his influence upon the whole student body.

It is generally admitted that adequate appreciation of music depends directly upon familiarity with good music. Realizing that the opportunities of our students for hearing artists of the highest excellence have been altogether too rare, leading members of the student body laid before their fellows a plan whereby the students might have their own regular artists' concert series each year. This plan involved the payment of a dollar by each student to the Bursar, the total sum thus collected to be supplemented, if necessary, by a subsidy from the Carnegie Music Fund. The plan was submitted to a vote of the full-time students and was approved by a large majority. The following programme for the session of 1936-1937 has been arranged:

Tuesday, December 1	Russian Imperial Singers
Friday, January 29	Jeannette Vreeland
Tuesday, February 23	Mildred Dilling, harpist, and Marcel Hubert, cellist - first North American tour.

Undoubtedly the day is rapidly nearing when there will be an insistent demand for a large number of trained and gifted teachers of music in both the primary and the secondary schools of our country. These teachers will not be required to devote their time exclusively to teaching music; rather, they will be expected to teach music in addition to regular established subjects. Consequently, provision will have to be made somewhere to train these teachers jointly in the regular subjects and in music. Obviously the university is one of the places for making such provision. The Administration is looking forward to the creation of a new type of undergraduate curriculum which will equip the new type of teacher that will be required. To make such a curriculum requires much study, conference and patience, together with a determination that educational standards, if changed at all, will be raised even higher than they are at present.

Another musical interest which the University is actively sponsoring is the Canadian Musical Festival. This has been made possible through the generosity of our distinguished honorary alumnus, Mr. Edward Johnson, and the London Male Choir. The proceeds of a joint concert given three years ago in London by Mr. Johnson and the Choir, approximately eleven hundred dollars, were to be devoted to instituting some sort of festival for the encouragement of music. It was finally decided to make the festival a competitive one and to open it to all Canadians on the express condition that only those are eligible to compete who have obtained seventy-five per cent. or over in some festival held elsewhere in Canada during the current year. This unique condition has the effect of stimulating competition in preliminary local festivals by providing a goal which lies beyond and through them. It has brought to our festival the cooperation of the directors of the other festivals. At the time of writing the number of entries is 410 for the first festival to be held from November fourth to November seventh.

The wide range of the University's musical programme is of great assistance in enabling the University to move more speedily than it could otherwise towards discovering the answer to the puzzling question; "What is the proper place of music in education?" Music in education and education in music are two different, though associated, things. In making provision for the latter lies part of the answer we seek, but a part only. The rest of the answer lies in careful experimentation and in the study of progress elsewhere.

The Federal Principle in Universities

While the charter of the University has authorized the organization and operation of the University on the basis of federation, it is only recently that the tremendous educational importance of the provision has been clearly realized. True, the device is not original in principle, being patterned after

the system developed half a century ago in the University of Toronto; nevertheless, it has a distinct individuality in that the majority of the colleges of the Federation are situated outside the city in which the University proper is situated. This creates a new set of conditions and problems, but on the other hand it offers a new kind of service which is capable of great extension in the future. A glimpse of its potentialities may be gained from the perusal of a paragraph contained in a recent annual report of Columbia University issued by President Nicholas Murray Butler. This paragraph was prompted by the admission of Bard College, situated at a considerable distance from New York City, into the Columbia Federation.

"It is plain that a principle of this kind is susceptible of very wide application, and it may well be that in this country we are seeing only the beginning of its usefulness. Bard College, admitted to the University's educational system in 1928, well illustrates what may be going to happen in many other cases in different parts of the United States. The small, separate and well-placed college is an institution of vital importance in our American life. We cannot afford to let fail any one of these colleges which has sound policies, high ideals and which has made a place for itself in the nation's intellectual life. At the same time, one must face the problems which confront them. One of the most serious of these is how to provide intellectual companionship for their teachers and scholars. These men and women are most desirous of having the stimulus and encouragement which come through association with teachers and scholars like-minded with themselves, and through opportunity to use the resources and equipment, the libraries and laboratories, of a well-established neighbouring university. The best and easiest way to accomplish these ends, while protecting the small college and preserving its independence, is to welcome its incorporation in a university's educational system as a distinct and independent federal unit. Its trustees can then appeal with renewed confidence for financial support. They can secure the service upon their faculty of the highest type of teaching scholar, and they can gain for their undergraduates and alumni those associations, both personal and academic, which mean so much throughout life. The experience of Columbia University is perhaps opening a new door for the still more effective federal organization of higher education in different parts of the country."

French Summer School, Trois-Pistoles, Quebec

The steady increase in enrolment noted in my previous reports has been continued in the recent session. This, while highly gratifying, is nevertheless not so significant as the increase in the influence of the School and in the range of sources from which students are drawn. The School is recognized throughout Quebec as a factor in interpreting English-speaking Canadians to their French-speaking compatriots. The young English-Canadians who have enrolled up to the present have been of a type that are studious, serious in purpose and of superior moral character. That the Directors' policy of

careful selection from among applicants is a sound one is fully proved by results. We desire as students only those who wish to take fullest advantage of the opportunities offered them by the School.

Especially noticeable this year has been the enlarged enrolment from other universities than our own. While the number from Western Ontario rises slightly, the number from other institutions rises rapidly. Students are now coming from the Prairie Provinces on the west and from Nova Scotia on the east. Registration of students from the United States has begun and applications for registration in the session of 1937 have already been received from several universities in that country. Experience gained from the policy of selecting candidates will be most useful in dealing with the increased number of applicants from outside. Every applicant in this class is informed that he cannot be accepted unless he is fully vouched for by the President of his own university.

Registration of Teachers

Readers of the Registrar's Report cannot but have noticed the large increase in the figures of total registration. This increase deserves explanation. It will be found in the reports of the Director of the Summer School and the Director of University Extension and Adult Education. These show that the increase is largely due to the new requirements of the Department of Education exacted for the first time in the Summer Session of 1935, namely, that candidates for the Teachers' Permanent First-Class Certificate must take a certain number of university courses in order to qualify. The action of the Department in taking this definite and novel step to raise the standard of teaching in the Public Schools of the Province is to be most highly commended. Western Ontario, like the other universities of the Province, has responded promptly and to the limit of its resources to the call for service made upon it by the Department's action.

Registration of Non-Canadian Students

The Registrar's figures upon enrolment of United States students in the University require a measure of comment. If an analysis of the figures were given, it would show that all but a few of these students - all but thirty-two, to be exact - were registered in affiliated colleges, and, chiefly, in Assumption College. This is very significant. First, it removes the otherwise possible criticism that a large number of undergraduates from another country are being maintained by means of Canadian public money. In the second place, it permits one to point out the pertinent fact that each non-Canadian student in the University proper pays double fees. Since the financing of Assumption College, an affiliated institution, is carried on quite independently of the University, the College is therefore free to admit all qualified applicants regardless of their national origin.

The situation of Assumption on the frontier between Canada and the United States is a most happy one educationally from the point of view of both University and College. It gives the University of Western Ontario a direct opportunity to give to the people of the United States a concrete demonstration of the soundness and strictness of Canadian standards in higher

education. The net result is that these standards have won the respect of American citizens who have had occasion to observe them as exemplified in their own individual cases or in their own families or in the families of their friends.

Several educators in Michigan and Ohio have remarked to the writer frequently that the practical comparison of two types of college curricula and methods afforded by Assumption College in the border States has been a healthy stimulus to educational thought in that region. It is only fair that our university acknowledge the reciprocal form of this contribution; the proximity of the University and its colleges to the border enables us to derive much valuable information and inspiration from the universities and colleges of the States that lie nearest to Ontario. The contribution to educational service and progress in North America made by one of our university's affiliated colleges is one which the University and the citizens of Western Ontario should appreciate at its real worth.

But still another observation is required. We must not be guilty of underestimating the advantages brought to the University and its colleges by the presence of students who come from outside Canada. They give back in full measure all that we give to them and thus give our educational system and our social life a certain cosmopolitan touch. It must be remembered that a university in order to be truly a university must be international in its outlook in addition to being national in type. Those cities that are so fortunate as to possess real universities have a wide range of contacts with the world that other cities rarely acquire. These contacts offer possibilities of greatness in the sphere of trade and commerce as well as in the sphere of the sciences and the arts. Western Ontario citizens of broad view and far-reaching vision will welcome the day when their university will have within its walls a great variety of instructors and students of other than Canadian national origin. It is through the presence of such as these that new ideas and new social attitudes can be introduced into our national life. The cost will be returned to us many times over in the form of benefits material as well as intellectual and spiritual.

The Museum

Through the generosity of the Provincial Department of Public Works the University has acquired a large number of exhibition cases which formerly belonged to the old Museum of the Toronto Normal School. This equipment has enabled the Honorary Curators, Messrs. A. H. and Wilfrid Jury, to make an orderly display of the excellent collection of Indian relics from various sites in Western Ontario. Mr. Wilfrid Jury is in the Museum every Friday and is ready to welcome all visitors who wish to see the specimens on exhibit. He will gladly explain to them the significance of the numerous types of objects displayed. He is arranging an educational programme for children of Public School age; the mornings of a succession of Saturdays will be devoted to the visiting classes. Undoubtedly this arrangement is the soundest method of implanting in the minds of the adult citizens of the next generation a keen interest in the relics of the civilization that reigned in Western Ontario before the coming of the white man.

The Jeffrey Stamp Collection now occupies a place in the new Museum and may be seen upon application to Mr. J. H. Crocker, Chairman of the Stamp Committee.

REGISTRAR'S DEPARTMENT

Registrar: K. P. R. Neville, M.A., Ph.D.

Associate Registrar: Helen M. Allison, B.A.

UNIVERSITY COLLEGE - STUDENT CREDIT-HOURS BY DEPARTMENTS (continued)

Summary of Findings

The average faculty teaching-load (including part-time staff) = 243.371 student credit-hours a week, a decrease of 2.28 student credit-hours.

The average faculty load (including only full-time staff) = 330.84 student credit-hours a week, an increase of 36.05 student credit-hours. This average is taken on all departments of work (Summer School, Extension, Intramural and Extramural). On Intramural and Extramural work alone, there is a decrease in the full-time faculty teaching-load, which amounts to 12.75 student-credit-hours a week less than last year. Therefore the increase must be attributed to the registration-gains in the Summer School and Extension Departments, in both of which faculty-members are paid for any extra work they undertake.

The average faculty load (including only part-time staff) = 84.93 student credit-hours a week, on all divisions of work (Summer School, Extension, Intramural and Extramural). On Intramural and Extramural work only the average part-time faculty load is 91.01 student credit-hours a week.

The blue-ribbon for the heaviest load of the year goes to Dr. Liddy, who taught 1073 student-credit-hours - 513 in the Extension Department and 560 in the Intramural and Extramural divisions. The heaviest intramural load was carried by Dr. Battle, with a total of 632 student-credit-hours, part of which was shared by demonstrators, however.

TOTAL	<u>2507</u>	<u>1789</u>	<u>71.36%</u>	<u>313</u>

NOTE: The difference between the 2507 students who wrote final examinations and the 2480 students registered may be explained by the following facts:

- (1) some students wrote Summer Session examinations as well as January and May papers.
- (2) some students were ill and had their examinations deferred.
- (3) some students failed to write, although they did not formally withdraw.

COMPARATIVE PERCENTAGES
(For the last six years)

OF STUDENTS WHO CLEARED ALL
THEIR WORK AT THE FINAL EXAMINATIONS

	<u>1930-31</u>	<u>1931-32</u>	<u>1932-33</u>	<u>1933-34</u>	<u>1934-35</u>	<u>1935-36</u> [#]

UNIVERSITY COLLEGE OF ARTS

Dean: K. P. R. Neville, M.A., Ph.D.

"I beg to submit herewith my report as Dean of the Faculty of Arts, University College, for 1935-1936. It has become the habit the last few years to begin my report with the statement that "there has been no matter of major importance decided in our Faculty during the past year." That is true again; several items have been initiated but decisions have not yet been reached. They will have to form a part of the report for 1936-1937.

"The distribution of the staff for the past year was as follows:

Emeritus Professors	2
Professors	19
Associate Professors	13
Assistant Professors	18
Instructors	8
Lecturers	8
Graduate Assistants	9
Demonstrators	20

Of the last subdivision, two of the men are full-time and probably should come into some category that would make the differentiation from the ordinary demonstrator simple and plain."

Dean Neville comments upon a feature of the organization of his staff which deserves study and perhaps reformation. The number of lecturers and other part-time instructors has become disproportionately large. In other words, a greater amount of the instruction given by these officers should be in the care of full-time officers, for the reason that people giving their full time to teaching duties can devote more continuous attention to their tasks than can those serving on a part-time basis. The University is to be congratulated on the high academic status and the excellent attainments of its part-time staff, but realizes that in making replacements and new appointments special thought must be given to the selection of full-time teachers. Since the present condition is due solely to the rapid growth in the number of students and the diminution of the University's income, the remedy can be easily seen. Would that it could be as easily applied! A stationary or a decreased enrolment with a stationary income would make the beginnings of a change possible. The probability of an increased enrolment with no present prospect of increased income emphasizes the stubbornness of the condition. Chiefly, however, it adds another reason to the already great accumulation of reasons why the University should soon make a vigorous and concerted endeavor to enhance its income.

The Dean calls attention to a matter that may touch our university as it is expected to touch nearly all other similar institutions in North America. This is the forecast of the statisticians who have been studying trends in population. At least as far as the United States is concerned, they claim that the falling birth-rate has already brought about a decline in

public school attendance, is now beginning to affect that of the secondary schools, and will in 1941 become visible in college and university enrolments. It is wisdom for Canadians to ascertain if the same results will be effective in Canada. If they are inevitable, then Canadian universities which, like our own, rely to a large extent upon income from fees, must promptly take steps to increase endowments and to insure increases in income from other sources also. The reference to this possible situation suggests to the University of Western Ontario a very profitable line of thought and, it may be, of action.

"For years we have been forced to mark time in ways that it is not necessary to repeat. They have been mentioned in my last five annual reports. But there is a general condition that is more insistently forcing attention. The second half of the nineteenth century was marked by expansion in the field of science, but it was 1916 before Western recognized the fatal effect of standing in the way of the wave. The twentieth century promises to be just as vitally the era of the social sciences. It behooves us to attempt to keep, if not abreast, at least within sight of the vanguard of scholarship in these fields.

"For the cooperation in all divisions of the work of the Dean that has been so generously given by the Departments of Administration and Instruction I have nothing but grateful appreciation."

FACULTY OF MEDICINE

Dean: F. J. H. Campbell, B.A., M.D., M.R.C.P., F.R.C.P.(C).

"Following the session of 1935-1936 the Faculty of Medicine graduated thirty-three students at the Spring Convocation. No difficulty was experienced in placing graduates in suitable internships or teaching appointments. Reports received from hospitals utilizing our graduates as internes during recent years indicate that they seem to do uniformly successful work and the hospitals express themselves as quite well satisfied.

"The enrolment of the Faculty of Medicine for the session 1935-1936 was 182 students.

"Owing to the marked advance in the medical sciences in the last few years, increased demands for time on the undergraduate medical timetable are being made. Due to this demand for clinical instruction and contact with students, we find our clinical facilities badly overcrowded. Partly to cope with this situation a limit of forty students has been placed on the freshman class. Our inadequate teaching facilities in Victoria Hospital should once more be brought to attention.

"In spite of this ever-increasing load of teaching and routine activities the staff have been carrying on what research they could. A report of publications by members of the staff will, I expect, appear elsewhere in your report.

"During the week of September 9th to 13th, 1935, a post-graduate refresher course was conducted by the members of the Medical School Staff. Approximately forty physicians of the district registered for this course. Apparently there is a need for this and a similar course is being arranged for this autumn.

"In June the largest and best attended meeting of the Ontario Medical Association ever had was held in this city, indicating the importance of London as a medical and health centre. Many scientific exhibits were sent from the University to this meeting.

"There were several changes in the personnel of the staff during the year. Dr. William E. Waugh, one of the best known and most loved teachers in the history of the Medical School, passed away on May 25th, 1936. Dr. David H. Nichol, a member of the staff for many years, also passed from our midst on February 3rd, 1936. Dr. Nichol was one of the ablest teachers on our staff.

"Other changes on the professorial staff included Dr. J. K. W. Ferguson's resignation from the Department of Physiology and Dr. S. G. Chalk's transfer to Toronto from the Department of Psychiatry. Promotions include Dr. G. H. Stevenson to Professor of Psychiatry, Dr. R. A. Waud to Professor of Pharmacology, Dr. W. P. Tew to Professor of Obstetrics and Gynaecology, Dr. E. M. Watson to Professor of Pathological Chemistry, Dr. P. M. Andrus to Assistant Professor of Radiology and Dr. D. W. Crombie to Assistant Professor of Medicine."

FACULTY AND INSTITUTE OF PUBLIC HEALTH

Dean and Director: A. J. Slack, M.D., D.P.H.

"The remarkable and consistent growth in the work of this Department of the University has continued throughout the year. Student registration in the Faculty of Public Health was nearly double that of the previous year with 18 full-time and 13 part-time graduate nurses registered in the Public Health Nursing courses. There were 19 graduates at the Spring Convocation, 6 of whom received the degree of Bachelor of Science in Nursing and 13 the Certificate of Public Health Nurse. The demand for qualified Public Health Nurses is indicated by the fact that more than half of this year's graduates have already received either temporary or permanent appointments in Public Health Nursing. During the year regular lecture courses were given to 114 students registered in the Faculty of Medicine and to 190 different individual undergraduate nurses in the Training Schools of Victoria, St. Joseph's and the Ontario Hospitals, making a total of 335 individual students receiving instruction from the full-time staff of the Institute.

"The Institute Library now contains 734 bound volumes, 445 of which have been classified in the Library of Congress classification. Besides this many unbound volumes are on the shelves. During the year 529 books and 780 journals were loaned. Accessions during the year include 24 new books and 40 bound volumes of journals.

"The Institute laboratories provide laboratory service for more than 200 different municipalities in Western Ontario. The total number of laboratory examinations conducted during the year ending June 30, 1936, was 80,095 as against 73,732 for the previous year. The Institute serves a large and populous district and it would appear that our laboratory work is bound to increase because only the simpler laboratory procedures can be satisfactorily carried out in the laboratory of the practising physician. The numerous expressions of appreciation received from practising physicians of Western Ontario would indicate that the laboratory service provided by the Institute is filling a definite need. The Institute serves as a distributing centre for the free biological products and outfits for the collection of specimens provided by the Ontario Department of Health. During the year ending June 30, 1935, over 4,000,000 units of free insulin, 17,141 packages of other free biological products, and 32,531 outfits for the collection of specimens were distributed from this centre.

"We regretfully record the resignation, in June 1935, of Dr. A. R. K. Matthews, Assistant in the Division of Bacteriology and Pathology who has been a valued member of our staff during the last five years. This is the only change in the professional staff and this position has been filled by the appointment of Dr. W. S. Dick.

"Little progress has been made on original research owing to the steadily increasing amount of routine laboratory work. Standard methods of analyses are continually undergoing revision and new and improved methods are adopted only after their value is proven by thorough testing in various laboratories. In this connection the Institute has cooperated with the Standards

Methods Committee on Milk Analysis of the American Public Health Association by testing out a proposed new medium for plate counts on 200 routine specimens of milk. The Institute has maintained close association with the Public Health and Nursing Organizations of Canada and has been honoured through the appointment of members of its staff to executive positions in some of these organizations. With the cooperation of the Central Laboratory of the Ontario Department of Health the Institute arranged and displayed a scientific exhibit illustrating "Laboratory Services to Physicians" at the annual meeting of the Ontario Medical Association.

"It is worthy of note that the courses for graduate nurses in the Faculty of Public Health are attracting larger classes of students and that facilities which provided satisfactory accommodation for the small classes of a few years ago are not adequate for the larger classes of today. The one lecture room and the two student laboratories are still fairly adequate but more space is urgently required for the library and reading-room and for student cloak-rooms.

"The building which has so well served our needs during the last twenty-four years now requires additional space or rearrangement of space to permit the satisfactory conduct of the rapidly increasing amount of laboratory work and the larger student body."

DEPARTMENT OF SUMMER SCHOOL, EXTRAMURAL STUDIES,
UNIVERSITY EXTENSION AND ADULT EDUCATION

Chairman: Professor H. R. Kingston

(a) Division of Summer School and Extramural Studies
Director: Professor H. R. Kingston

"The total attendance in the Summer School this year was 906, an increase of 335 or 59% over that of last year. A comparative table of figures for 1936 and 1935 follows:

REGISTRATION

	<u>1936</u>	<u>1935</u>	<u>Increase</u>
Number registered in credit courses			
in London	480	314)	
in Trois-Pistoles	43	44)	46%
Number registered in non-credit courses			
Trois-Pistoles (associate students)	5	0)	
Orchestral Music)	
and Music Appreciation	41	41)	-6%
Master Vocal Classes	51	62)	
	<u>620</u>	<u>461</u>	
Total	620	461	
Duplicates	<u>15</u>	<u>10</u>	
Total number registered in University subjects	605 ¹	451	34%
Department of Education - Vocal Music	191	149	
Department of Education - Education	161	0	
Canadian Bureau of Music and University			
- Piano Class Methods	<u>8</u>	<u>24</u>	
	965	624	
Duplicates between Department of Education and University	<u>59</u>	<u>53</u>	
NET TOTAL SUMMER SCHOOL ATTENDANCE	<u><u>906</u></u>	<u><u>571</u></u>	59%

1. The discrepancy between this figure and that given by the Registrar's Office is due to the inclusion in the latter of those students in Education who by October 13th obtained credit for Psychology 36b from the Psychology taken in Education (see second paragraph on next page).

"One reason for the advance in the Summer School attendance is, of course, the ruling of the Department of Education requiring a year of university work and also a summer course in Education, for making permanent the Interim First Class Certificate. Teachers whose Interim Certificates have expired may have them extended on the condition that a minimum of the additional university work is being successfully carried.

"The course in Education was directed by Dr. C. E. Mark, Principal of the London Normal School, and was entirely under the jurisdiction of the Department of Education. In this course Dr. Liddy of the University Staff was asked to give the Psychology. Those who obtained "B" standing in this Psychology are being given (on payment of the \$9 tuition fee) credit for Psychology 36b (Educational Psychology). About 125 qualified for this credit.

"A second reason for the increase in Summer School numbers is the definite emphasis that is being placed on music in the Elementary and the Secondary Schools. This is evidenced by the fact that the registration in the Vocal Music courses of the Department of Education rose from 149 to 191. Of this group 54 students registered also for some university work. Thus, while the University does not receive any financial return directly from the courses which the Department of Education holds here, still the Summer School does obtain, indirectly, considerable benefit, financially and otherwise.

"The Master Classes in Vocal Music, under the direction of Mr. Frederick L. Newnham, were very successful although the number in the classes was lower than last year. The Master Classes included 21 students from the Vocal Music courses of the Department of Education and would have drawn a greater number from that source had there not been a conflict in the timetable due to extra work taken by many of the students in the latter courses.

"Near the close of the first term of the Summer Session Mr. Newnham and the Master Classes gave a recital which was open to the public and was well attended.

"The Orchestral Music courses enjoyed their usual success under Mr. Walter Rennie's enthusiastic leadership, which appeared entirely unaffected even by the ten days of extreme heat. The question of the giving of a certificate for these courses by the Department of Education is being discussed with Mr. Fenwick, the Director of Music in the Elementary and Secondary Schools of Ontario, and it is hoped that satisfactory recognition will be possible in the near future. In addition to the usual orchestral courses, Mr. Rennie offered a course in Music Appreciation which met a real need and demand for definite instruction in this work.

"The Vocal Music courses of the Department of Education were again under the direction of Mr. Charles E. Percy, Director of Music at the Normal-Model School, Toronto. Mr. Percy's methods not only give a solid foundation for the teaching of vocal music in the schools but are proving to be very workable and his courses are making a valuable contribution to the practical and effective teaching of music in our schools. During the fifth week Mr. Percy's classes broadcast a programme over CFPL.

"The French Summer School at Trois-Pistoles had another very excellent eight-week session. This School is making a cumulative contribution to our national life whose value may well be beyond estimation. A summary of the work of the French Summer School by Professor Jenkin, the Director, follows this report.

"Altogether the University offered 26 courses in the Summer School. These do not include the courses given by the Department of Education.

"The usual athletic and social programme carried through on Friday afternoons and evenings under the direction of the Executive of the Summer School Students' Association was most successful and made a valuable contribution to the Session. On the fifth Friday evening a programme began with an excellent "Hour of Music" by the Orchestral classes and the Vocal Music classes of the Department of Education.

"During the past year 357 students took work through the Extramural Department. For 165 of this number this was the first work taken with the University.

"A very helpful advance has been made during the past year in the method of carrying on the extramural work, especially in those courses where the numbers are large. One instructor is put in charge of the course by the Department concerned and he holds a conference with the readers in the course for each set of assignments that are sent in by the students. In this way the work is thoroughly discussed and a standard and uniformity are obtained that are most desirable. Some remuneration for the Staff members involved, as well as for the other readers, is helping to make the extramural work be considered more as an integral part of our university programme and less as an additional burden, necessary but somewhat of a nuisance.

"During the summer eight students, who were close to graduation and who needed one or two subjects not on the Summer School programme, were allowed to take extramural work. We now have 327 extramural students, exclusive of the above number, enrolled for the present year and the registration is increasing daily.

"Last June 11 extramural and Summer School students graduated with the B.A. degree bringing to 194 the total number of such graduates up to the present time. Eleven more will graduate at the October Convocation.

"I should like to emphasize again the desirability of increasing at the earliest possible moment the regular University Staff to a point where the intramural load can be lightened sufficiently to make it possible for this Staff to carry on the extramural work with the minimum of help from outside readers. The more the extramural work and the intramural work are handled by the same Staff members, the higher will be the standard of the extramural work. I should like, however, to pay tribute to the careful and effective service that has been rendered by our outside readers during the past year, as well as to those members of the permanent Staff who have given to this work a very great deal of time and painstaking effort."

(b) Division of French Summer School, Trois-Pistoles, Quebec.
Directors: Professor H. E. Jenkin
Professor M. E. Bassett

"Forty-three students were enrolled for the full course and five associate students took certain selected non-course classes. They included graduates and undergraduates from the following institutions: Western Ontario 29; Dalhousie 1; Manitoba 1; McGill 2; McMaster 4; Toronto 6; Mount St. Mary's Seminary of the West 1; St. Mary's College 1; St. Vincent's Seminary 1; Runnymede Collegiate Institute, Toronto 1.

"It has been possible to form a group consisting mainly of teachers and the majority of the other graduates have been included in the Repeaters' section; the comparative homogeneity of each section has had its repercussion in increased smoothness of working. For the first time students from the United States are included in the group, one, an ordained priest, hailing from Philadelphia, the other, a sub-deacon, travelling from Kentucky. Another student came from Winnipeg to take the course. The group has shown a commendably keen spirit and has derived great pleasure from its observation of life and customs here.

"In this connection it is interesting to note the experience of the London County Council, London, England, which granted 22 modern language scholarships for the first time in 1935, with the object of enabling selected students to study abroad. The majority of the selected students went abroad early in July and returned at the beginning of October. Sixteen went to France, five to Germany and one to Spain. The official report indicates that the experiment has produced valuable results and continues, "Some of the students' reports indicate close observation of the life, thought and character of the people of the foreign nations visited. There is also no doubt that in many cases the families who received the scholars did more than might reasonably be expected to give their guests a happy time without neglecting the primary object of the scheme. Apart from the improvement effected in the scholar's efficiency in the language, it is evident that the experience of travel and residence on the Continent has resulted in a broadening of outlook and increased self-reliance, and also in the establishment of contacts and friendships which should tend to foster international understanding."

"The amounts granted in respect of these scholarships did not exceed \$250.00 per person, and it is evident that the expenditure necessitated for students to follow the course at Trois-Pistoles compares very favorably with the amounts deemed necessary to finance a student going abroad from England. The Council was so satisfied with the result of the first year's working that it is hoped to finance some 40 students this year.

"The International Summer School Movement sponsored by the same educational authority also enables many other students to take short trips abroad and it is gratifying to reflect that the movement started by Western four years ago has its parallels in its objects, results and conclusions in these more recently organized activities.

"Inquiries about next year's school are already to hand, one of them coming through the local Curé. Although the forthcoming elections are naturally occupying a great deal of the local attention, our reception has been as cordial as ever.

"An innovation this year was the securing of a group accident insurance policy at a very reasonable rate and over 50% of the students availed themselves of the opportunity.

"As was the case last year three local teachers were engaged to help in the compilation and correction of the journals and in the giving of 'dictées' and 'causeries'; these were supplemented by short talks or lectures by local friends.

"The painting group under the supervision of Professor Bassett numbers three; a fourth student stimulated by its enthusiasm is making a start. It should be put on record that Professor Bassett devotes the entire takings from the sale of his water-colours to aiding certain students to come to Trois-Pistoles. Last year \$62.00 was raised.

"The books forwarded from the Library at Western for the second time have been in greater demand this year, and have proven a source of great pleasure and profit on days when outdoor activities were not possible.

"The suggestion of Professor Bassett that a money prize be offered by the University through the Summer School for the encouragement of improved French diction among the children of the local school would, if adopted, help to stimulate the local movement for better speech now being carried on here as in other parts of Quebec. It would seem desirable to make the announcement early in the autumn so that the prize might be awarded at the closing exercises and prize giving in 1937."

(c) Division of Extension and Adult Education
Director: Professor S. F. Maine

"Late afternoon and evening classes for credit and non-credit students were maintained in Brantford, Bothwell, Chatham, Ingersoll, Kitchener, London, Leamington, Petrolia, Sarnia, Stratford, St. Thomas, Welland and Windsor. This represents a one hundred per cent. increase in the number of centres served, there being thirty-two classes in thirteen towns or cities. The policy of utilizing staff members of the affiliated colleges was continued and instructors were drawn from Assumption, Alma and Waterloo Colleges as well as University College. An important experiment in the field of extension work was tried in view of the requirements of the Department of Education for Permanent First Class Certificates. Classes meeting for double periods on alternate Saturdays were established in various centres (included in the above list). This plan decreased radically the expenditure of time and money spent in travel on the part both of the instructors and of the class members. It also doubled

the utility of staff members, for on alternate Saturdays they were available for other classes. These weekly and bi-weekly classes proved to be an important department of university extension and in conjunction with the Summer School they rendered excellent service in our constituency. It is worthy of note that the examination results, even in the bi-weekly classes were quite on a par with those of intramural classes.

"All of the above-noted classes were open to non-credit students. In London a purely non-credit class in French conversation, following the general lines of the school at Trois-Pistoles, was maintained and satisfactory results were obtained.

"The thanks of the University are due to the librarians and the public libraries in various centres, for in the majority of cases they have cooperated wholeheartedly with the students in their area.

"In cooperation with local clubs, societies and organizations of various types in different centres, the Extension Department arranged numerous series of lectures. The Browning Club of the City of London added another year to its successful career. Alma College again made use of the extension service and sponsored a series of lectures in St. Thomas given by Dr. Madge Macklin. The Watford Reading Club, the oldest organization of its kind looking to the University for its lecturers, completed another successful year, as did also the newer organizations of the same kind in Arkona and Petrolia. In Ingersoll a group of approximately fifty citizens organized for a series of twelve lectures in Psychology. Keen interest was evinced. In Exeter and in Windsor series were organized in conjunction with church groups, in one case the lectures being given on Sunday evening in the place of the church service. The Extension Department also continued to maintain its contacts with such groups as the Business Women's Canadian Club of London, the London Rotary Club, the St. Thomas Kiwanis Club, etc. where in each case several speakers were supplied.

"Under the heading of vocational interest various groups were instructed during the year. Probably the most unique activity was the Police School organized in conjunction with the Police Commission of the City of London. In addition to the local police, the officers from surrounding centres were invited to attend and did so in some cases. Lectures on law, various phases of police duty, etc. were given. The lectures being of a technical nature the services of the County Judge, Police Magistrate, Chief of Police and Crown Attorney were utilized. The course stimulated a great deal of interest among the police officers and further instruction has been requested.

"A Parent Education Class, which has been carried on in connection with the local Mental Hygiene Clinic, was continued and extended in its scope and a second class of the same nature was organized in Windsor.

"A group of St. Thomas businessmen formed an organization for the purpose of obtaining lectures dealing with the analysis of financial statements, security values, foreign trade, etc. These lectures were given acceptably by members of the Business Administration Department.

"The work of the University with the Chartered Institute of Secretaries has become a major activity. During the year the Extension Department, in return for a grant of five hundred dollars, undertook the instructional work of the Institute in connection with its students in London, and a series of one hundred and twenty lectures was organized in preparation for the intermediate and final examinations.

"Following the successful experiment of last year, the University again, in conjunction with the Western Art League, offered a series of five lectures on Art Appreciation and brought to the City Principal P. S. Dobson, Mr. L. A. G. Panton, Mr. Frederick Bridgen, Mr. D. G. W. McRae and Professor E. R. Arthur who dealt with various phases of Art and Architecture.

"An innovation was established when the Extension Department undertook to sponsor a series of lecture-recitals on Music Appreciation, given by Mr. Frederick L. Newman, the newly appointed Director of the Western Ontario Conservatory of Music, in association with the eminent pianist, Mrs. Gertrude Huntley Green. This, as also the Art Series, will be continued next year.

"Coöperation with the Workers' Educational Association is becoming increasingly important. While this Association is financed by the Provincial Government and the Carnegie Foundation through the University of Toronto, our university has been requested to supply tutors in London, Brantford, Woodstock, Stratford and Windsor. Our Director of Extension is a member of the Executive of the Association and the tutorial committee and with other staff members is called upon to participate in the promotional activities of the Association.

"The Workers' Educational Association has also extended its activities to farmers under the heading of the Agricola Study Clubs. Our university has participated also in this work.

"The Extension Department distributes a Bulletin which lists approximately two hundred lectures which are offered by our various staff members. These Bulletins are distributed widely and frequent calls are made by Service Clubs and miscellaneous groups of various types, for the services listed in the Bulletin.

"As in previous years, the Extension Department has given its coöperation to other departments of the University in the promotion of lectures of a more or less popular nature. This year the Classics Department, with the Extension Department, invited Professor Salmon of McMaster University to lecture on Horace and Augustus. This is a form of coöperation which so far has not been widely used by the various university departments.

"A total of 926 lectures was given under the headings noted above as compared with 580 the previous year. Apart from the Workers' Education lectures, which though arranged through the Department, are not actually departmental lectures, a total of 816 lectures was given, which is a 62% increase for the year. The registration of students has also shown a marked increase, there being 658 credit students registered. As there were 174 duplicates this leaves a total of 484 students registered for credit in the Extension Department.

"In addition to the lectures arranged through the Extension Department various members of the University Staff have reported lectures, talks and demonstrations which they have given. Professor J. W. Burns addressed the Natural Science Section of the Ontario Educational Association, discussing a revision of the methods of teaching Chemistry. Dr. H. W. Hunten and George C. Allen presented a paper to the Pure Chemistry Section of the Dominion Chemical Convention, while Dr. J. A. Gunton presented one before the Education Section of the same Convention. Dr. Gunton also reported the meeting of the Canadian Association of Textile Colourists in our university. Professor Reilly and Principal Waller report lectures which they had personally arranged.

"The members of the staff of the University of Western Ontario are making large and significant contributions to the work of adult education which is an increasingly important phase of education."

THE LIBRARY BOARD

Chairman: Reverend C. C. Waller
Librarian: Professor Fred Landon

"The report of the Library Board for the academic year 1935-1936 shows a gratifying increase not only in the available resources of the libraries but also in their use by students and members of the Faculty. At April 30th the number of volumes in the libraries of the University was 126,973 distributed as follows:

University Library	104,677
Medical School Library	21,638
Institute Library	658

"The net accessions during the year totalled 6,357 of which 5,220 were to the University Library, 1,092 to the Medical School Library, and 45 to the Library of the Institute of Public Health.

"The number of books and journals loaned by the Libraries during the year was 87,268, an increase over the previous year of 4,646. The loans in the various libraries were as follows:

University Library	69,046
Medical School Library	16,913
Institute Library	1,309

"The end of the second year of occupancy of the Lawson Memorial Library affords opportunity to emphasize once again the suitability of the building to its purposes. The first year in the new building was much occupied with getting the books and other material in good order, many readjustments being necessary. The second year has offered opportunity to systematize the routine of the library service and to develop some of the minor services

of the library. There is still a considerable remainder of the Barnett Collection, roughly classified for use but not catalogued, which should be dealt with as soon as any addition can be made to the present small staff. At present it is impossible to do much more than keep up with the new purchases and the books received on exchange. During the past year a total of 7,532 books were catalogued, 1,096 of these being from the uncatalogued Barnett section.

"Exchange relations with other libraries have continued to be productive in bringing to the library of the university many valuable additions of books and pamphlets at no expense other than the cost of transportation. More than 3,300 volumes have been added to the shelves in this way during the past two years. Special mention should be made of the valuable acquisitions from the Library of Congress, the University of Michigan, Brown University, the University of North Carolina and the Grosvenor Library at Buffalo.

"During the year several improvements were made in the library quarters at the Medical School. These included the redecoration of the main reading room, improvements in the lighting, an increase in the number of seats for readers, and the installation of a humidifier to keep the air at a proper degree of moisture.

"The large room on the ground floor of the Lawson Library which was designed for museum purposes has been properly fitted up during the year and now contains on exhibition the Jury collection of North American Indian material as well as other objects of interest. Mr. Wilfrid Jury, as one of the Honorary Curators of his collection, has attended regularly each week to meet students and others and to explain the features of the collection."

AFFILIATED COLLEGES

ASSUMPTION COLLEGE

President and Superior: Father T. A. MacDonald, M.A.

"The past year has noted an increased registration at Assumption College. The attendance reached a new high level of 333. Thirty-five of these were women registered at Holy Names College. This arrangement of giving the young women of Windsor an opportunity of a university education is meeting our fullest expectations.

"The staff of 1935-1936 was increased by the addition of two new members. More rapid expansion is controlled only by a lack of resources. 1935-1936 marked a much closer union between the College and the Institute of Mediaeval Studies of Toronto. The different professors of the Institute each gave a course of lectures which proved very interesting both to the students and the citizens of Windsor. We hope to expand this branch of our work considerably during the next few years.

"The Lecture League, inaugurated in 1934-1935, had a very outstanding season. The different lecturers were taken from outstanding universities and they were received very enthusiastically by the citizens of Windsor. The programme being adopted for 1936-1937 promises to surpass that of last year.

"The library enjoyed continued growth and we wish to acknowledge several gifts to it. An increased student body has already taxed the library space and some arrangement must be made for expansion. We wish to thank the Carnegie grant for many splendid additions made to the library.

"In the field of athletics we had a very successful year. The football team had fair success. The basketball team were again Michigan-Ontario champions and lost the Dominion title only in an extra contest game. The hockey team again captured the Michigan-Ontario crown. Competition in debating and public speaking was engaged in with several teams from across the border.

"During the year 1936-1937 we hope to add several honour courses to our curriculum."

HURON COLLEGE

Principal: Reverend C. C. Waller, M.A., D.D.

"The report of Huron College for the session 1935-1936 includes a change in the Act of Incorporation whereby permission was given to add not

less than four nor more than eight laymen to the governing body of the College. As a result the following persons have been added to the Council and the Institution is gaining by their interest and coöperation: Colonel I. Carling, Colonel I. Leonard, Judge Willson, Messrs. V. P. Cronyn, Roy Moore, E. A. Wilson, L. W. Wedd, and Dr. W. Hunt.

"The resignation of the Reverend J. H. Craig in November to accept the rectorship of St. Mary's Church, Vancouver, involved changes in the College Staff. The Reverend R. T. Appleyard succeeded him as Dean of Residence, the Reverend K. E. Taylor in Christian Ethics, the Reverend C. F. L. Gilbert and the Reverend A. A. Trumper in Senior and Junior Homiletics respectively. Mr. Craig had been with us slightly over five years and with quiet efficiency and self-sacrificing devotion had made a very marked contribution to the residential life of the College, establishing a tradition which made the transfer of his duties to his successor very easy. I should like to bear witness to our appreciation of his work and service rendered both to the College and University during his sojourn in London.

The College curriculum was also enriched through the work of Mr. Frederick L. Newnham who gave a course in Vocal Expression and also organized a Glee Club in the College. For this service we are largely indebted to the University. The response from the students has been very satisfactory.

"Two years ago the College decided to lengthen its course to six years from pass matriculation for students taking Arts and Divinity and though the transition is not completely effected yet one benefit already observable is that the students taking the Arts course with Theological options are no longer permitted to overload their course by taking additional credits from the Theological Course, such studies being now rigidly deferred to the postgraduate years.

"The Residence was practically full during the whole year. The increased number of residents have also materially assisted our financial resources. The Treasurer's forecast of receipts and expenditures seems to indicate the prospect of a balanced budget. Notice was received of two designated benefactions of \$1,000 each to our Building Fund and small additions were made to the capital funds of several benefactions held or being built up by the College for specific purposes.

"It might also not be out of place to mention the apparently increased interest in the Arts course with Theological options provided for Ministerial students on the part of non-Anglican students in the University and the large enrolment of non-ministerial students of both sexes in the course provided by the College in Christian Ethics. The contacts which Huron College makes and the influence which it thus exercises in the University student constituency is much greater than the statistics of our own enrolment indicate. Our full-time enrolment intramural was: B.A. 3; undergraduate 21; part-time Arts 2; part-time Theology 1; and part-time B.D. (examination only) 2. Actually graduating there were: B.D. 1; B.A. 3 and Diploma for L.Th. 5."

URSULINE COLLEGE

Dean: Mother M. St. Anne, M.A.

"At the opening of the year 1935-1936 the registration and staff of Ursuline College were practically unchanged. The graduation class in June 1936 was honoured with two University gold medals, one for History and one for French. The growing library at Brescia Hall is being rapidly catalogued on the Library of Congress plan.

"The basketball and badminton teams have developed this year among Brescia undergraduates because of stimulus from intercollege games. These teams are not made up of such expert players as larger university groups may choose, but their courage is good and their sportsmanship is praiseworthy. The students of St. Peter's Seminary have profited during the past sessions by the addition of a five thousand dollar hand ball alley.

"Last autumn, through the generosity of a friend, St. Peter's Seminary installed a very fine set of Croydon chimes costing ten thousand dollars. They are five bells operated from an electric clock which sound at the quarters and at the hours of Angelus."

WATERLOO COLLEGE

President: Reverend Frederick B. Clausen, D.D.

Dean: Willis C. Froats, M.A., B.Paed.

"During the past academic year Waterloo College continued its work successfully in spite of financial problems. The Faculty had one professor less than in the previous year. The enrolment of the College was 59 full-time students and 35 part-time students. Eleven part-time teachers were in attendance for the 1935 Summer Session only. Altogether 105 different names appeared on the roll.

"The Dean of Women, Miss Hannah M. Haug, M.A., resigned her office in September 1935 and no successor has been appointed. Reverend Professor H. L. Henkel, B.A., after a long illness, died on March 2, 1936. Reverend Dr. V. K. Nikander has been appointed to the Chair of Philosophy and Religious Knowledge."

ACTIVITIES OF WOMEN STUDENTS

Adviser to Women: Professor Dorothy Turville, Ph.D.

"Certain new features in connection with the activities of women students have been introduced this year by the Adviser to Women, putting into practice theories advocated by experienced educationalists in a sixty-hour course in Student Personnel Administration at Columbia University during the summer of 1935. While dealing with some problems not found in the Canadian system, and with others not applicable to this particular university, the course was nevertheless fruitful in ideas whose adaptation to conditions here has been possible, and, we hope, profitable. Contacts with Deans of Women in many institutions throughout the United States were also established during the six weeks of attendance at classes and at social functions.

"Plans are now under way, through the initiative of this university, to arrange a meeting of the Deans of Women of Ontario for the discussion of problems of mutual interest to those whose work concerns undergraduate women. In this way new ideas for administrative methods may be eventually evolved for the benefit of the students.

"Relations of the Adviser to Women with the women students have been noticeably more varied and more frequent during the academic year 1935-1936 than in the past. They may be summarized under the following headings:

Freshmen

"Our aim is to give the Freshmen as much help as possible in the first few weeks of the term in order to adjust them easily to their new academic and social surroundings and to prevent them losing time in the process. In addition to the regular programme planned by the University through the Freshman Pre-Registration Committee of the Faculty, the women are further assisted by the upper-class women students to one of whom as a Big Sister each Freshman is assigned. These friendly contacts are of use in the minor details of routine with which the seniors are familiar.

"This year a course of Orientation Lectures was inaugurated daily in the first week of term and compulsory for Freshmen women. The series consisted of:

<u>How to Take Notes in Lectures</u>	- Dr. Eleanor Doherty;
<u>Some Facts About Western</u>	- Dr. K. P. R. Neville;
<u>How to Study</u>	- Miss Leola Neal;
<u>The Student's Relation to</u>	
<u>the Registrar's Office</u>	- Miss Helen Allison;
<u>▲ College Girl's Manners</u>	- Mrs. E. K. Albright.

The general opinion among students and staff seems to be that the academic and other conditions showed an improvement which might justifiably be attributed in part, at least, to these lectures. The course, therefore, will be repeated in September 1936.

"Beginning with the second week in October the Freshmen were invited to personal interviews with the Adviser, varying in length from fifteen to twenty minutes according to individual needs, and during the course of which the aim is to establish a basis of mutual understanding. Adjustments of various kinds are frequently made as a result of and by these interviews.

Women's Organization

"The Undergraduate Women's Organization, including as its members all women students divided into fifteen groups, is controlled by a Council of sixteen senior students with the Adviser to Women as Honorary President. This Council has held eight regular meetings during the year to discuss matters of interest to the welfare and comfort of its constituency. Constitutional amendments have been made to ensure a measure of continuity in the personnel of the Council for the future.

"The chief purposes of the Organization are to foster friendships by the operation of the Big Sister movement, and by social activities of the groups, and to raise money for improvements in the Women's Common Room and for the building of a Women's Union as a social centre for the University student body. The enthusiasm of the women for the accomplishments of this latter goal is very marked, but unfortunately the time-honoured means of raising money by tea-dances and the sale of colours and programmes at rugby games are no longer as profitable as they once were, owing to changing circumstances. The amount added to the fund this year was \$192.15, less than half of the net proceeds of some former years, with an expenditure of an equal amount of time and energy. If the women are to be encouraged in their efforts by the vision of an early realization of their ideal, new approved activities must be devised.

Academic

"In addition to the regular academic census taken of all students by the Faculty in November, and the consequent interviews with those showing low grades, a spring inventory was taken, through my office, of women students placed on probation in January, and interviews again given to those still below the line. In some cases this led to modification of the number of courses taken, with a view to improvement of academic standing.

Sororities

"Matters pertaining to the three fraternal groups of women are administered by a Panhellenic Council which meets monthly. Valuable work was done this year by the Council in the codification of the functions of the Council and of rulings for sorority observance.

"The two local groups have been approached by official visitors of National Sororities, who have made also investigations of the status of groups and of the University, with the result that the local group known as Alpha Kappa Chi has been pledged as Alpha Omega chapter of Gamma Phi Beta, an organization of commendable standing. This additional recognition given to the University will be valuable from the viewpoint of broadening of contacts for

the University as well as for individual members of the student body and alumnae who will participate in the national conventions of their respective groups.

"Active membership is divided as follows:

Gamma Phi Beta	24
Pi Beta Phi	30
Pi Sigma	<u>26</u>
	80

This total membership is 25% of the enrolment of women in the Arts and Medical Faculties of the University.

"The groups are continuing to contribute to the University through their function of housing, and in this regard a further definite advantage will be added to each house in September 1936 by the introduction of a house-mother as social hostess, whose appointment and whose duties in part are sanctioned by the Administrative Council through the Adviser to Women.

Housing

"The total number of women requiring residence accommodation was 153. Of these 28 were located by special permission with relatives or friends, 29 were in the three sorority houses, and the remainder (96) were dependent on private residences, approved by the Adviser to Women. The publishing of a list of approved residences involves an initial inspection of the atmosphere and general character of each. Unfortunately it is impossible to insist on all conditions which are desirable for the welfare of students, owing to the limited number of homes at our disposal in this section of the City. Therefore, the desirability of these houses is by no means uniform, although some are completely acceptable.

Self-Help

"An increasing percentage of women students are finding it necessary to supplement their sources of income by self-help of various kinds. In addition to the positions in the gift of the University through its departments - demonstrating, library work, etc. - the most usual form of occupation is domestic, whereby a student undertakes some household duties for the family with whom she is residing in return for room and board in part or in whole. In most cases this proves very satisfactory and of mutual benefit, and it is to be hoped that more families in London will avail themselves of this opportunity for philanthropy. The Adviser to Women has found it possible to act as liaison officer to bring together families and students needing help. Other requests for student help, such as tutoring, Y.W.C.A. work, have also been referred to needy students.

Interviews

"Many interviews relating to the foregoing matters have been sought by the women students, and in addition advice on questions of health, vocations,

and other individual problems has been requested. The flattering manner in which suggestions are received and followed, and the general friendly attitude of the students in all social and official relations is most gratifying."

DEPARTMENT OF PHYSICAL EDUCATION

Director: Professor J. Howard Crocker, M.P.E.

Directress of Women's Activities: Mary R. Barker

"In reviewing the work of this department for 1935-1936 one is conscious of a highly satisfactory cooperative spirit existing in all the separate divisions of the physical education work.

"The Physical Education Board, through its chairman, Dr. Claude Brown, was a strong source of strength to every undertaking. The Athletic Association Directorate, composed as it is of two members of the Faculty and five students, was ever aware of the needs of the student body from every point of view. Their deliberations during their regular meetings were a credit to those who had elected them.

"The Stadium Committee was active in its desire not only to have the Stadium ready for rugby football but to maintain it so that all students would receive the best service in either track or harrier clubs or the indoor sports such as boxing, wrestling and fencing, which were conducted during the year within the Stadium.

"The playing fields have always been kept ready for the use of the students in their games and the Grounds Committee's efforts have been fully appreciated.

"Through the medical examinations conducted at the beginning of the year we were able to cooperate with the Health Insurance scheme in order to care for every student requiring medical attention.

"The intramural sports made up probably the most satisfactory part of our programme as 496 men and 287 women actually participated in recreative games during the academic year.

"The Women's Department, under the supervision of Miss Mary Barker and her student assistant, Miss Doris Weston, carried out a very satisfactory programme of competition and instruction for the women students. Probably the high light of the Women's Department during the past season was the winning of the Intercollegiate Basketball Championship and the women students are to be congratulated on the splendid team that represented the University in this event.

"The Intercollegiate competitions during the past year were the most generally successful that we have had in the history of the Department.

Although the rugby team did not do well until the latter part of the season, they indicated splendid improvement and brighter promises for the next season. Both soccer teams, Senior and Intermediate, were successful in winning the championships in their respective sections. Next year this group will be joined by Toronto making a four-team group in each division.

"There was a great lack of valuable material for composing a championship basketball team but in spite of this condition Mr. L. H. Davies succeeded in developing a team that finished second in this intercollegiate sport. In track and field athletics we accepted the invitation of the Intercollegiate Union to send the pick of our men to the Senior Track Meet in Toronto. The outcome of this decision was highly satisfactory as our team finished in third place which was a good standing for our first year in senior competition.

"Our boxing, wrestling and fencing club entered its third season with a good turnout in each branch of this club, as a result of which we were able to win the Intercollegiate championship in these events.

"Classes in swimming, life-saving and badminton were held and competition in tennis, golf and volleyball was conducted for men. In the Women's Department not only was there competition in basketball, tennis and badminton but successful classes were conducted in archery, dancing and gymnastics. In the Hygiene class this department had seventy-five women students enrolled.

"For two years now the Athletic Association has weathered the financial stress of such a large programme and this year closed the season with \$164 on the right side of the ledger."

CANADIAN OFFICERS' TRAINING CORPS

University of Western Ontario Contingent

Officer Commanding: Lieutenant-Colonel E. E. Reilly

"Lieutenant-Colonel E. E. Reilly who had been on leave of absence with permission to travel abroad resumed command of the unit before the beginning of the training year. The first parade was held in the Armouries on Wednesday, October 9, 1935. Fourteen and one-half days' training were completed.

"This training consisted of the Infantry and Medical syllabuses drawn up at the beginning of the year. The officers of the Medical company did all their own training; in the Infantry companies, Map Reading and floor training were completed without assistance from outside the unit, but Captain H. W. Foster, Lord Strathcona's Horse (Royal Canadians), G.S.O. III, M.D. No. 1, gave the lectures in Tactics.

"The training included a field exercise on the platoon in attack and on the locations of RAP at the Talbot Farm, organized by Major A. Woods

in conjunction with the General Staff of the district.

"The Commanding Officer inspected the unit formally October 31, 1935 and February 5, 1936. A ceremonial parade was also held on February 26, 1936 for hearing the message to the army from His Majesty the King on the occasion of His accession. On that parade the Commanding Officer swore in the Headquarters officers and Officer's Commanding companies who in turn swore in their subalterns in front of their men. The District Officer Commanding inspected the unit on March 25, 1936.

"Church parade was postponed from November to March 29, 1936; but there was a well attended public parade with band at the municipal Armistice Day service on November 11, 1935. The contingent was represented at the Jubilee Service on May 5, 1935, at the church parade of the Canadian Fusiliers, at the annual dinner of the Canadian Fusiliers, and at the Memorial Service for His late Majesty King George V.

"The annual regimental dinner took place in the Hotel London on November 27, 1935. It was honoured by the presence of Brigadier-General J. M. Ross, CMG., DSO., District Officer Commanding, and several of the senior officers of the district and representatives of the University. Speakers included General Ross, Lieutenant-Colonel M. M. Dillon, MC., Officer Commanding the 2nd Bn., C.M.G.C. and Major G. Ingram, R.O., of the University Board of Governors.

"The band appeared at football games in London on October 12, 1935, October 19, 1935 and November 9, 1935, besides all public parades of the Contingent. Meetings of the Officers' Mess were held on January 8, 1936, February 5, 1936, and on March 9, 1936, this last occasion being a farewell dinner for Major S. G. Chalk, MM., who is leaving London.

"During the training year the Contingent qualified members for the following certificates:

Militia Staff Course - 2

March examinations 1935 - "A" Infantry	2
"A" Medical	10
"B" Infantry	6
"B" Medical	8

March examinations 1936 - "A" Infantry	3
"A" Medical	1
"B" Infantry	3
"B" Medical	1

Canadian Small Arms School, Connaught Ranges, "A" Wing - 1

Changes in Officer personnel:

To be Lieutenants:

2nd Lieutenant H. S. Heard, 27.9.35.
2nd Lieutenant E. G. Jarman, 29.9.35.
2nd Lieutenant J. H. King, 30.9.35.

Major S. G. Chalk, MM., to be Acting Commanding Officer for a period of six months from January 15, 1935.
Captain D. M. Lawrason to be Acting Commanding Officer, "B" company for six months from January 15, 1935, vice Major S. G. Chalk, MM.
Captain H. M. Thomas confirmed in appointment as Adjutant from January 1, 1935.
Lieutenant E. T. MacFarlane transferred to General List C.A.M.C., February 1, 1935.
2nd Lieutenant F. D. Poole is retired March 6, 1935.
To be Lieutenant: 2nd Lieutenant D. M. Egner, November 14, 1935.
Lieutenant W. S. Johnston is transferred to General List C.A.M.C., March 6, 1935.
The period of tenure of command of Lieutenant-Colonel E. E. Reilly is extended to December 31, 1936.
To be 2nd Lieutenants (supy.):
Gordon Robert Scarrow, 1.5.35.
Thomas Frederick George Lawson, 2.5.35.
Dean Oliver de Colton Steadman, 12.11.35.
Clarence Leith Scott, 13.11.35.

The undermentioned are permitted to resign their commissions:
2nd Lieutenant C. K. Stuart, 22.11.35.
2nd Lieutenant M. H. H. Farr (supy.), 22.11.35.

The undermentioned are transferred to the Reserve Unit:
Lieutenant K. W. Melandress, 1.1.36.
Lieutenant J. W. Symony, 1.1.36.
Lieutenant H. S. Heard, 1.1.36.

To be 2nd Lieutenant (supy.):
Kencil Horne Mitton, 1.1.35.

Reserve Unit: Captain H. J. Nunn, MM., is transferred to the Reserve of Officers (M.D. No. 11), 1.1.36.
Captain T. H. Kirkpatrick is detailed for duty as Adjutant 1.1.36, vice Captain H. M. Thomas who vacates the appointment with effect 31.12.35.

To be Major:
Captain H. M. Thomas, 1.1.36.
Lieutenant T. J. Finlay is transferred to the Reserve Unit 2.1.36.
Lieutenant S. F. Sharpe is transferred to the Reserve Unit 3.1.36.
Lieutenant A. E. Williamson is transferred to the Reserve of Officers, M.D. No. 2, 21.3.36
To be 2nd Lieutenant (supy.): Joseph Ford Steadman, 1.4.36.
To be Honorary Colonel: Major-General J. M. Ross, C.M.G., D.S.O., V.D., Res. Off., 1.6.36.
Strength of Contingent for training year 1935-1936: 107 all ranks."

THE ALUMNI AND ENDOWMENT DEPARTMENT

Director: J. Mackenzie Dobson, B.A. (Arts)
Associate Director: J. W. Crane, M.D. (Medicine)

"The collection of old pledges to the Endowment Fund during the depression has compared more than favorably with similar collections made for other educational institutions and for business concerns during the same period. Indeed, a number of new pledges have been obtained in this time for the Endowment Fund. The card records have been carefully supervised in order to be kept up to date and many personal calls have been made where pledges were overdue.

"The Alumni Loan Fund was started four years ago primarily to help, where necessary, final year students to enable them to complete their courses. The maximum of a single loan was fixed at \$200, this being considered as 50% of the financial requirements for a year. This fund has been kept up by voluntary contributions canvassed for by the Alumni Office. Interest in this work has been steadily increasing. Payments have been received from former students, alumni, faculty, members of the Board of Governors, undergraduates and friends of the University in London, Sarnia, Stratford and other places. This loan fund is a revolving one and loans are made on the basis of 5% interest; consequently, the fund grows as the students repay their borrowings. The history of such loans elsewhere is that there have been but few losses. Students, having borrowed from a fund, remember that they were helped at a time when they most needed help and invariably make repayment as soon as possible. Many who become affluent make donations to the same fund over and above their obligations.

"Occasional exceptions have been made to the policy of restricting loans to final year students. This is done when some individual donor is interested in a particular student; the Loan Fund then acts as the agent for the donor and carries out his wishes. This fund has an excellent record in helping a number of the holders of our best scholarships and our gold medallists to finish their university courses. The scope of this fund will be greatly extended by the very generous gift left by one who was always interested in needy students of scholarly ability - the late Mr. J. Stanley Lovell of London

"The Placement Bureau has contacted firms by mail and personal calls in and out of the City in regard to opportunities for our students and alumni. The office interviews students and supplies forms and letters of recommendation. This Bureau has discovered many openings for students and alumni alike.

"The Sir Arthur Currie Scholarships provide annually two new four-year scholarships. The funds for endowing these scholarships were raised by public subscription with payments spread over five years. The Alumni Office looks after the collections and the Alumni Secretary is treasurer of the Fund.

"Records of the place of residence and activities of graduates are kept with the greatest care. There are four separate card indexes of graduates and former students arranged as follows:

1. A master file containing all names arranged alphabetically;
2. A class year file, in which the names are grouped by their graduating years;
3. A geographical index by which those students in a particular city or area are grouped together;
4. A file showing the distribution by colleges and faculties.

"In addition to the card indexes biographical files are kept containing all available information about each individual graduate. This information is secured by clipping the newspapers, getting notes from secretaries of branch alumni organizations and by interviewing returning classmates.

"Much care has to be exercised to keep the addresses of graduates up-to-date. The changes range from 25% per year among the medical graduates to 35% among graduates in arts.

"It should be remembered that the majority of our graduates have been on the alumni lists for only a very few years. Up to and including 1920 the total for the Arts Alumni was 163 and in Medicine approximately 450. From 1920 onwards the classes grew tremendously and from a total of 713 in all faculties in 1920 we now have a list of over 3,000 and of this number more than 2,000 are arts graduates who have gone out in the last ten years. It is in the next few years that we shall begin to feel the real strength of our Alumni as they become settled and attain positions of influence in their respective communities."

BENEFACTORS AND BENEFACTIONS

It is very gratifying to be able to announce the inception of two separate foundations. At the present time the modesty of the generous friends who have established them requires the suppression of their names for the time being. Ultimately these foundations will add significantly to the power of the University to undertake important programmes of advanced studies and investigation. The example of the anonymous benefactors should be as inspiring to other friends of the University as it is encouraging to the Administration.

The University expresses its gratitude to several donors of a number of appropriate and timely gifts:

To Doctors W. J. and Hugh Stevenson, London, for a number of snake skins, bird skins and animal heads;

To Mrs. J. E. Bodaly, London, for a small collection of African birds;

To Mrs. Albert Brown, Chatham, for a number of Western Ontario Indian relics;

To Mr. Thomas Walsh, Windsor, for two large upholstered chairs for the President's Office.

We record with regret the passing of a former benefactress of the University, Mrs. R. W. Travers, of London. For many years she was constantly helping the Administration in a most effective though unostentatious manner.

APPOINTMENTS AND AWARDS RECENTLY WON

BY ALUMNI AND SENIOR STUDENTS

- E. Appleyard, Meds '30 - Membership in the Royal College of Physicians.
V. A. Callaghan, Meds '23 - Fellowship in the American College of Surgeons.
L. G. Cargill, Meds '23 - Elected to the London Board of Education.
S. G. Chalk, Meds '22 - Appointed Chief of Staff, Psychiatric Hospital, Toronto.
Randall Cole, Arts '36 - Assistantship in Mathematics, University of Wisconsin, Madison, Wisconsin.
Hugh J. Creech, Arts '33 and '35 - Fellowship at the Banting Institute, University of Toronto.
Hugh Dowker, Arts '33 - Proctor Fellowship in Mathematics, Princeton University, Princeton, New Jersey.
A. B. Ferguson, Arts '35 - Fellowship in History, Cornell University, Ithaca New York.
Malcolm Ferguson, Arts '32 - Assistantship in the Department of Biology, University of Illinois, Urbana, Illinois.
J. Harold Fox, Arts '25 and '26 - Professor of Education, Colgate University, Hamilton, N.Y.
Douglas Fryer, Meds '33 - Fellowship in Public Health, University of Toronto.
William E. Gibson, Meds '37 - Junior Fellowship in the Canadian Royal College of Surgeons.
H. Lyons Hunt, Meds '02 - Appointed Director General of the College of Surgeons at Geneva, Switzerland.
L. M. Jones, Meds '17 - Appointed Superintendent of Epworth Hospital, South Bend, Indiana.
Maurice Kingston, Arts '35 - Assistantship in Mathematics, University of Toronto.
Carson Mark, Arts '34 - Assistantship in Mathematics, University of Toronto.
A. Mascari, Meds '34 - Appointed House Surgeon, Guest Hospital, Dudley, Birmingham, England.
Clayton McGuffin, Arts '36 - Municipal Chapter, I.O.D.E. Scholarship.
A. D. McLachlin, Meds '32 - Junior Internship in Surgery, General Hospital, Toronto.
John Moore, Arts '36 - Assistantship in Mathematics, University of Wisconsin, Madison, Wisconsin.
Ernest Raymond, Arts '35 - Fellowship in Classics, University of Toronto; for 1936-1937 - Fellowship in Classics, University of Chicago.

- Goldwin Smith, Arts '33 - Fellowship in History, Cornell University, Ithaca, N.Y.
- Borden Spears, Arts '36 - Alumni Fellowship in Classics, University of Toronto.
- Alex Stewart, Arts '36 - Alexander MacKenzie Fellowship in Economic and Political Science, University of Toronto.
- John Tamblin, Arts '34 - Assistantship in Chemistry, Harvard University.
- Harold C. Trimble, Arts '35 - Fellowship in Mathematics, University of Wisconsin, Madison, Wisconsin, (renewal).
- Jack Vincent, Arts '28 - Lectureship in English, Queen's University.
- C. C. Wernham, Arts '29 and '30 - Instructorship in Entomology, Pennsylvania State College, State College, Pennsylvania.

RESEARCH AND PUBLICATION

Faculties of Arts, Medicine and Public Health

(The following names are arranged alphabetically).

<u>Name</u>	<u>Research and Publication</u>
Adams, Gordon A.	The ultra violet spectrum of hemoglobin derivatives and bile pigment. Nature, Vol. 137, p. 578, April 1936. The effect of heat on the calcium and phosphorus content of milk. Uncompleted. The ultra violet spectrum of hemoglobin derivatives. In press. The basic amino acid content of crystalline hemoglobins. Uncompleted.
Andrus, Paul M.	The mechanics of respiration. American Review of Tuberculosis, February 1936, Vol. 33, No. 2, pp. 139-164. A new method for the radiographic exploration of the mediastinum and concealed portions of the lung fields. Year Book of Radiology, 1935. An analysis of the causes of bronchiectosis. In press.
Battle, Helen I.	The early development of the pilchard (Clupea pilchardus Walbaum) off Plymouth Sound. Uncompleted.
Calder, Gordon	Vaccine treatment of chronic arthritis. University of Western Ontario Medical Journal, Vol. VI, No. 2. Common errors in the treatment of pollen hay fever and asthma. University of Western Ontario Medical Journal, Vol. VI, No. 3.

<u>Name</u>	<u>Research and Publication</u>
Collin, W. Edwin	The White Savannahs; a collection of critical essays on Canadian writers. The Macmillan Company of Canada, 1936. Marie Le Franc and W. H. Lawrence, a Comparison and a Contrast. Paper presented before Section II, Royal Society of Canada, May meetings, 1936. To appear in the Annual Transactions of the Royal Society.
Dearle, Raymond C.	Physical Science in medical practice. Proceedings of the Royal Canadian Institute, 1935.
Dorland, Arthur G.	Ireland and the British Empire Commonwealth. Echoes, November 1935. The law a custom of the South African constitution, by W. P. N. Kennedy. Wootton, Garnet A.	<p>Examination of cortical potentials. Uncompleted (with Dr. F. R. Miller).</p> <p>Characteristics of equipment for reproducing the human electrocardiogram. Uncompleted.</p>

APPENDIX

CHANGES IN THE FACULTIES

DECEASED — 1935-1936

MEDICINE

D. H. Nichol, M.D.C.M. - Instructor in Physiotherapy; Instructor in Medicine

APPOINTMENTS - 1935-1936

PUBLIC HEALTH

W. S. Dick, M.D., M.Sc. (Western) - Assistant in Pathology and Bacteriology.

ARTS

1936-1937

Rosalina Saez, B.A. (Western) - Lecturer in Romance Languages.

MEDICINE

Murray L. Barr, B.A., M.D. (Western) - Instructor in Anatomy.
Archibald J. Grace, B.A. (Saskatchewan), B.M., B.Ch., M.A. (Oxford) M.R.C.S. (England), L.R.C.P. (London) - Instructor in Surgery.
Wilbert W. Hollands, M.D. (Western) - Instructor in Pathology and Bacteriology.
David W. B. Johnston, B.A., M.D. (Western) - Instructor in Anatomy.
George R. Kerr, M.D. (Western) - Instructor in Pathological Chemistry.
Archibald McCausland, M.D.C.M. (Queen's) - Instructor in Psychiatry.
Joseph B. McKay, M.D. (Western) - Instructor in Pathology and Bacteriology.
Alexander E. McKercher, M.D.C.M. (Queen's) - Instructor in Psychiatry.
Walter Smither, B.A., M.D. (Western) - Instructor in Pathology and Bacteriology.
George W. Stavrazy, M.D. (Odessa), M.Sc., M.D.C.M. (McGill) - Lecturer in Physiology.

PROMOTIONS -- 1936-1937

ARTS

M. K. Inman, B.A., M.A. - From Assistant Professor to Associate Professor of Economic and Political Science.
L. W. Sipherd, B.A., M.B.A. - From Assistant Professor to Associate Professor of Business Administration.
W. A. Thompson, B.A., M.B.A. - From Assistant Professor to Associate Professor of Business Administration.
A. R. Walker, B.A., M.A., F. A.A.A.S. - From Associate Professor of Botany to Professor of Plant Pathology.

PROMOTIONS -- 1936-1937 (continued)

MEDICINE

- P. M. Andrus, M.D., F.R.C.P.(C) - From Assistant to Associate Professor of Radiology.
D. W. Crombie, M.D.C.M., M.R.C.S., L.R.C.P. - From Assistant to Associate Professor of Medicine.
G. H. Stevenson, M.B. - From Associate Professor to Professor of Psychiatry.
W. P. Tew, M.B., F.R.C.S., F.R.C.S.(C), M.C.O.G. - From Associate Professor to Professor of Obstetrics and Gynaecology.
E. M. Watson, M.D., M.Sc., F.R.C.P., F.R.C.P.(C) - From Associate Professor to Professor of Pathological Chemistry.
R. A. Waud, M.D., M.Sc., Ph.D. - From Associate Professor to Professor of Pharmacology.

RESIGNATIONS - 1935-1936

MEDICINE

- S. G. Chalk, M.D., B.A., M.Sc. - Instructor in Psychiatry.
T. H. Clarke, B.A., M.D. - Instructor in Pathology and Bacteriology.
J. K. W. Ferguson, M.A., M.B. - Assistant Professor of Physiology.
J. A. Lewis, M.D. - Instructor in Pathology and Bacteriology.
H. A. Mosser, M.D. - Senior Instructor in Pathology and Bacteriology.
J. B. C. Robinson, M.D., M.Sc. - Fellow in Surgery, Victoria Hospital.
D. G. Steer, M.D. - Instructor in Anatomy.

PUBLIC HEALTH

- A. R. K. Matthews, B.A., M.D. - Assistant in Pathology and Bacteriology.

LEAVE OF ABSENCE - 1936-1937

ARTS

- Frances Montgomery, Dr. Univ. of Paris - Instructor in Romance Languages.

1935 - 1936
